

Energy Solution

External Methods :

- **Generation Through Renewable Sources**
- **Solar Power Projects-Rooftop or Ground**
- **Windmill**
- **Power Trading thru Bilateral, Exchange Power and Open Access**

Internal Methods :

- **Energy Audit**
 - √ **Shop Floor Machines**
 - √ **Utilities, HVAC Systems, Furnaces,**
 - √ **Special Processes and Lighting.**
- **Derivation of the Specific Energy Consumption of plant.**
- **Find out potential losses of energy in terms of heat, light, electricity, fuel, water etc.**
- **Corrective Measures - Short Term and Long Term.**
- **Technical Support - Execution of corrective measures.**
- **Highly Qualified and Experienced Certified Energy Auditors (Electrical, Mechanical, Thermal**
- **State of the art instrumentation for Auditing, IRCA Certified Lead Auditors for EMS ISO 50001**
