

Air Ventilation Services

- We specialize in industrial-grade air movement systems designed to maintain air quality and thermal comfort.
- **Industrial Exhaust Systems:** Efficient removal of heat, dust, and fumes from manufacturing floors.
- **HVAC Ducting & Design:** Customized air distribution networks using the latest CAD modeling.
-
- **Energy Recovery Ventilation (ERV):** Systems that recycle energy from exhausted air to pre-condition incoming air.
- **Air Terminal Devices:** Installation of high-quality louvers, dampers, and diffusers.

Approach

Initial Site Assessment.

Calculation of Heat Load.

Calculation of required Air Changes Per Hour.

Selection of best quality products as per Air Changes Per Hour.

Design of Air Ventilation System.

Installation & Commissioning.

Handover Takeover with customer.
